

Bryan Lizotte was president of the Club during the 2006-2007 Rotary year. Bryan truly was a “magical” president. Though his education background at Quinnipiac University and early work experiences at Griffin Hospital and DIANON Systems was in medical technology, his first love was magic. He has been a professional magician and balloon sculpture artist since 1991 and regularly entertained Rotary members with his unique skills.

Though no longer in Rotary, he is still very active and is widely sought after for performances in the Valley and beyond.
